# Capability for Lunar & Inter – planetary missions

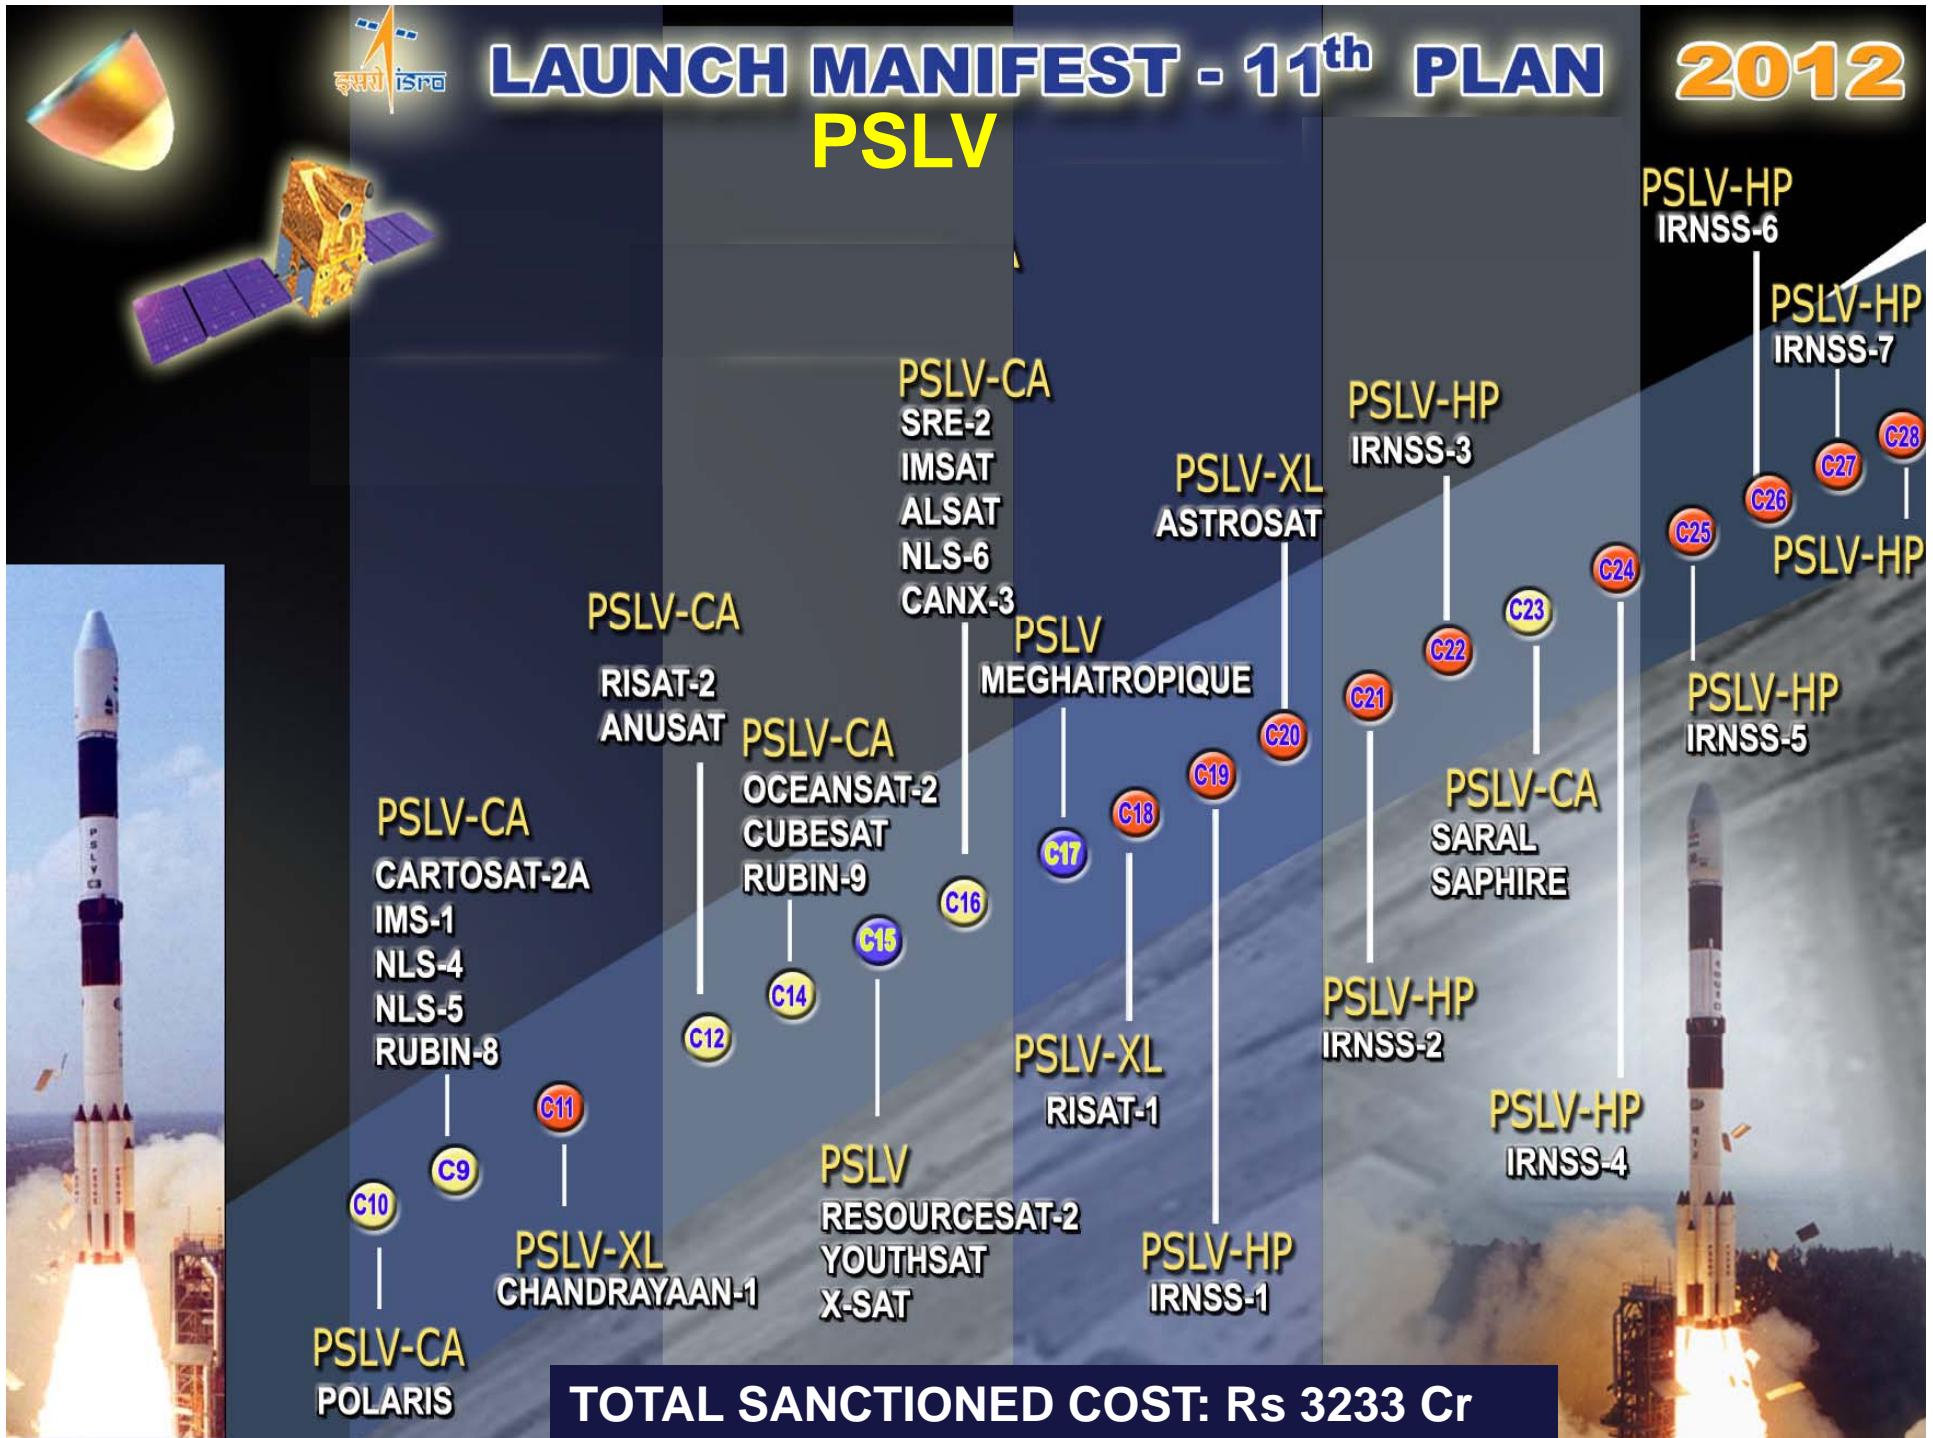

## Lunar capabilities

Launch Vehicle	EPO Size (km x km)	EPO mass (kg)	LPO mass (kg)
PSLV	250 x 22860	1380	720
GSLV MkII with CUS12	170 x 36000	2233	1174
	170 x 24000	2533	1220
GSLV MkII with CUS15	170 x 36000	2457	1294
	170 x 24000	2757	1332
GSLV Mk III	180 x 36000	4283	2285

## Inter-Planetary capabilities

Launch Vehicle	Orbital capabilities (kg)	
	Moon (LPO)	MARS
PSLV	720	150 – 230
GSLV	1294	350 – 530
LVM3	2285	650 – 1010

## Total cost F1 to F16: Rs 3551 Cr

## GSLV MkII Launch Manifest

The figure is a timeline chart titled "Operational flights" showing the sequence of Indian space missions from 2009 to 2015. The timeline is divided into four-year periods: 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, and 2014-2015. Each period is further divided into two quarters: Q III and Q IV.

**Launches:**

- 2009 Q III:** GSAT 4
- 2009 Q IV:** INSAT 3D
- 2010 Q I:** GSAT 5
- 2010 Q II:** GSAT 6
- 2010 Q III:** GSAT 7
- 2011 Q I:** Glonass M
- 2011 Q III:** GSAT 8
- 2012 Q I:** Glonass M
- 2012 Q III:** GSAT 12
- 2013 Q I:** GSAT 13
- 2013 Q III:** IRNSS
- 2014 Q I:** Chandrayaan II
- 2014 Q III:** IRNSS
- 2015 Q I:** GSAT 14

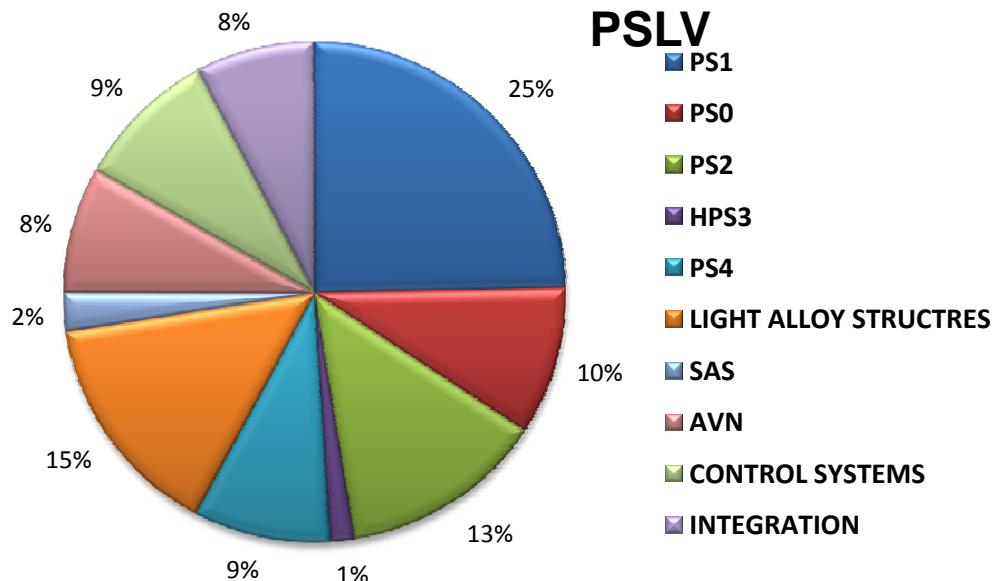

**Rockets:**

- 2009 Q III:** PSLV-C20 (F06)
- 2009 Q IV:** PSLV-C21 (F05)
- 2010 Q I:** PSLV-C22 (F07)
- 2010 Q II:** PSLV-C23 (F08)
- 2010 Q III:** PSLV-C24 (F03)
- 2011 Q I:** PSLV-C25 (F09)
- 2011 Q III:** PSLV-C26 (F10)
- 2012 Q I:** PSLV-C27 (F11)
- 2012 Q III:** PSLV-C28 (F12)
- 2013 Q I:** PSLV-C29 (F13)
- 2013 Q III:** PSLV-C30 (F14)
- 2014 Q I:** PSLV-C31 (F15)
- 2014 Q III:** PSLV-C32 (F16)

**Development Flights:**

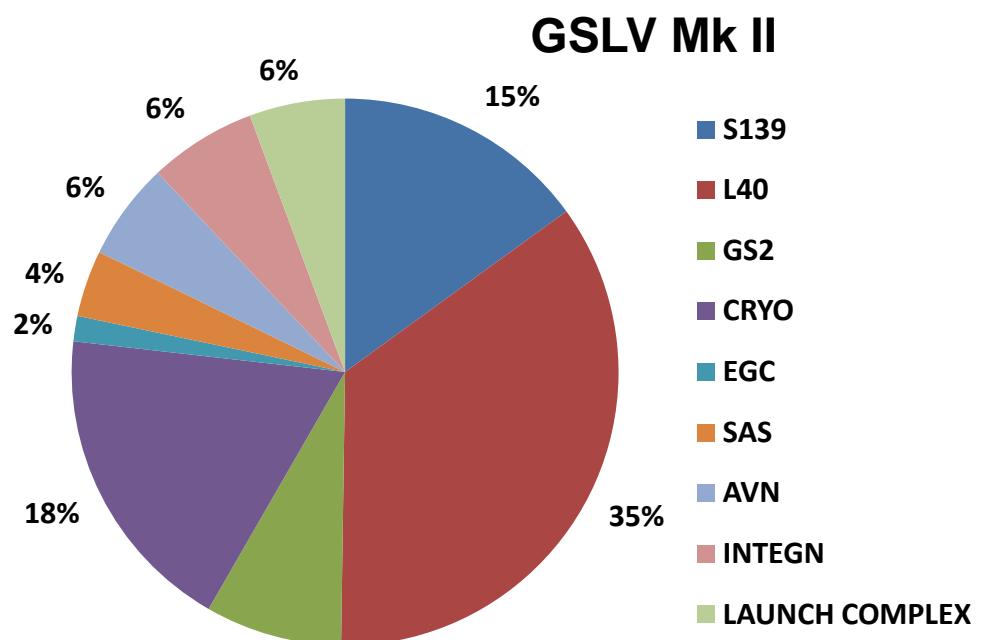

- 2009 Dev. Flight:** PSLV-C20 (F06)
- 2010 Dev. Flight:** PSLV-C21 (F05)
- 2011 Dev. Flight:** PSLV-C22 (F07)
- 2011 Dev. Flight:** PSLV-C23 (F08)
- 2011 Dev. Flight:** PSLV-C24 (F03)
- 2012 Dev. Flight:** PSLV-C25 (F09)
- 2012 Dev. Flight:** PSLV-C26 (F10)
- 2013 Dev. Flight:** PSLV-C27 (F11)
- 2013 Dev. Flight:** PSLV-C28 (F12)
- 2014 Dev. Flight:** PSLV-C29 (F13)
- 2014 Dev. Flight:** PSLV-C30 (F14)
- 2015 Dev. Flight:** PSLV-C31 (F15)
- 2015 Dev. Flight:** PSLV-C32 (F16)

# UNIT COST OF LAUNCH VEHICLES

## Cost break up for launch vehicle

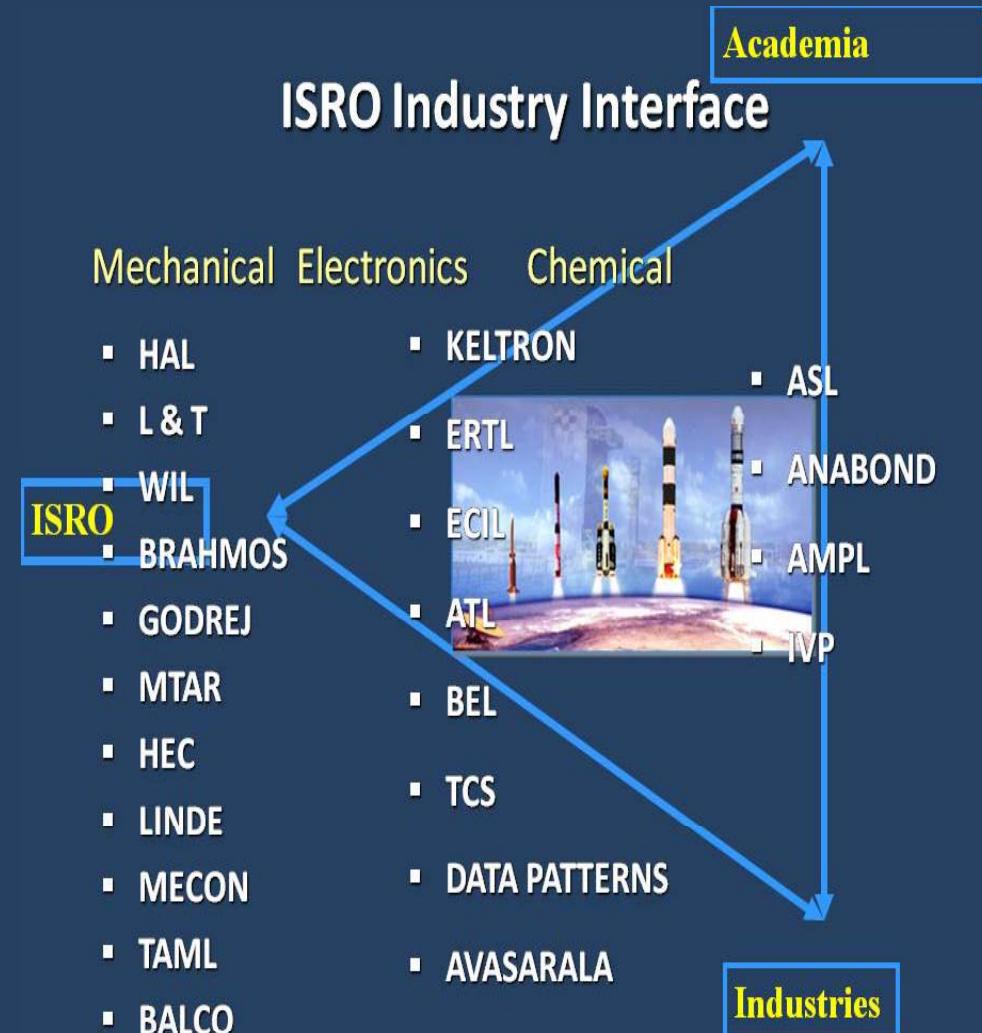

- Fabrication – 34%
- Materials & bought out items – 57%
- Propellant – 9%

# CURRENT LEVEL OF INDUSTRY PARTICIPATION

- Interstage structures and tanks production
- Motor cases materials and fabrication
- Liquid Engine subsystems and control components realisation
- Composite systems production
- Production and testing of electronic packages
- Production of liquid & solid propellants
- Production of raw materials
- Subsystem level integration and testing
- Facility build up in ISRO & in industries funded by ISRO

*More than 150 industries all over India*

# Industry participation in Propulsion systems realisation

## Vikas Engine

M/s Godrej &  
M/s MTAR  
M/s Brahmos

## Propellant tanks

M/s ASD HAL –  
PS2/GS2/L40/CUS/L1  
10/C25  
M/s Bhramos  
Aerospace – L40

## L40 Stage Integration

M/s ASD HAL

## CUS Engine/ C25 Engine

M/s Godrej &  
M/s MTAR

## Components & Modules

M/s MTAR – PS2/GS2/L40/  
S/c Valves  
(IPCM)

M/s LTE –  
TVC/RCT/PS4/PAM/  
S/c Valves  
(IPCS)

M/s LTE – DC torque motor  
for TVC &  
DC motor for motorised  
valves

## S/C propellant tanks

M/s BHEL  
M/s/KCP

Propellant production – UH25, MMH, LH2, N2O4  
M/s ASL , M/s HOCL

## Umbilical

M/s Microfine  
Bushings

Bellows & Metallic  
flexible hoses- HRCM  
Hoses/TVC Hoses/L40  
Hoses  
M/s Metallic Bellows

PTFE Flexible Hoses  
M/s MIL Ind.

## PS4 Engine

M/s ASACO

## Transducers

M/s LTE  
M/s Brahmos Aerospace

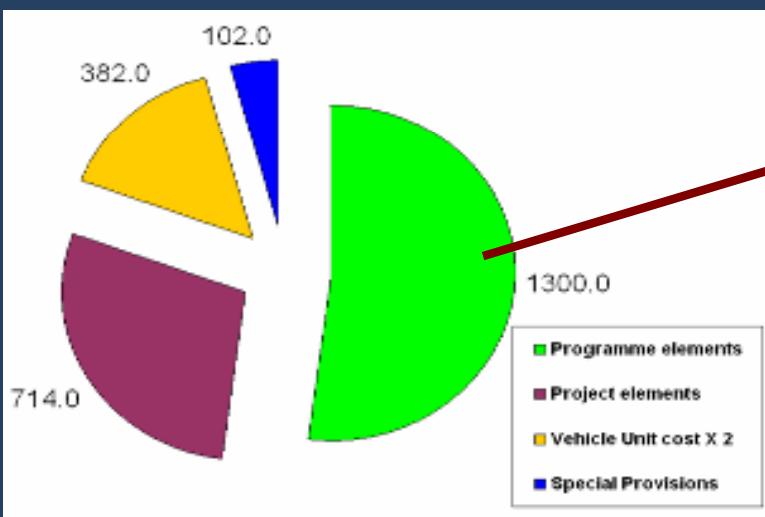

# LVM3 Development

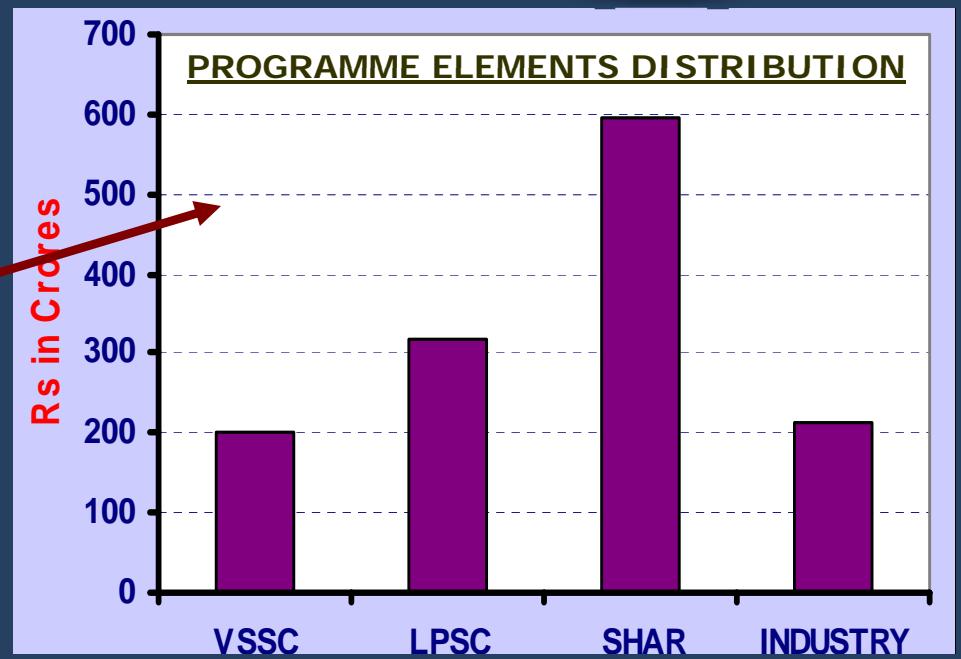

Development & test flight of two vehicles including facility build up.

## MAJOR FACILITIES

1. VEHICLE SYSTEMS FACILITIES AT VSSC
2. L110 & C25 INTEGRATION & TESTING FACILITIES AT LMF / LPSC
3. STRUCTURAL TEST FACILITIES AT VSSC & SDSC
4. MANUFACTURING FACILITES AT WORK CENTRES
5. SOLID PROPELLANT PLANT AT SDSC
6. LAUNCH COMPLEX FACILITIES

Rs. 1300 Cr for facility build up

# Production throughput required from industry

**4 PSLV**

- PS1 motor cases
- PS0 motor cases
- Light alloy structures
- Propellant tanks
- Vikas Engines
- Precision components
- Avionic sub assemblies
- Integration & testing

**2 GSLV**

- GS1 motor cases
- L40 stages
- Propellant tanks
- Vikas Engines
- CUS engines
- Precision components
- Avionic sub assemblies
- Integration & testing
- Light alloy structures
- Composite hardware

**1 or 2 LVM3**

- 4 m dia light alloy structures
- 5 m dia CFRP heat shield
- Propellant tanks
- 3.2 m dia motor cases
- Vikas Engines
- C25 Engines
- Precision components
- Avionic sub assemblies
- Integration & testing

**Batch Production in industrial environment considering economy of scale**

**Integration of Stages and Assemblies by Industry**

**Indigenization of materials**

**Indigenous facilities for Material processing**

**Facility build up for new projects on turn key basis**

The background of the slide features a grid of small, semi-transparent icons of Indian satellites, each with its name printed below it. The names include TWSAT, CARTOSAT-2A, MEGA-TROPPIQUES, ALTika-ARGOS, RESOURCESAT-3, OCEANSAT-3, GSAT-10, ACTS-11, GSAT-11, GSAT-12, GSAT-13, GSAT-14, GSAT-15, IRNSS-1, IRNSS-2, IRNSS-3, IRNSS-5, ASTRO-SAT, SENSE-E, SRE-2, I-STAG, ITM-1, and others. The grid is organized into columns representing different mission categories and rows representing specific years.

# MISSIONS

2006-07    2007-08    2008-09    2009-10    2010-11    2011-12    2012-13  
ISRO

## Conclusion

### Launch Capability Development

- PSLV payload capability, Mission flexibility, GSLV launch capability
- LVM3 to provide 4 ton to GTO capability by 2012.

### Launch Service Opportunities

- Mini/Mico satellite launch capability in PSLV. Various spacecraft dispensing schemes developed and qualified.
- Limited dedicated launch feasibility exists in PSLV & GSLV for various types of missions

### Industry Participation

- 60 % of 11<sup>th</sup> plan outlay was planned through Indian industries. Policy to have Industry as a risk sharing partner in the future endeavors of ISRO.
- Increased throughput from industries to cater to the higher launch frequency planned.

# Thank You
